† Historical research order only; all rows are pending, not qualified recommendations. ‡ Stabilized annual cash after replacement allowance, in USD thousands. * No recovery within construction plus 10 operating years. Payback starts at first spend and includes construction holding costs, ramp and replacement. No site has verified rights, grid capacity, an installed-cost quote or paid demand.
Stress inputs: 8 stalls; 40 kWh/session; 2/4/8 sessions per stall/day; prices $0.40/0.45/0.50; capex $1.269m/1.128m/1.034m. Electricity uses the EIA state commercial mean ×2/1.5/1, not a parcel tariff. Same-state sites share assumptions. All scenario sets fail the combined hurdle; optimistic recovery alone does not qualify a site.
