These 10 are information-acquisition priorities, not qualified investment recommendations. Partial can mean a historical record, tariff or application route; it does not close a gate. No full local paid-demand series, complete new-project cost or firm expansion-capacity commitment was obtained. No outreach, applications or paid studies were performed.

Shared stress cases, not local forecasts. Cash is stabilized annual free cash after replacement allowance; USD thousands. * No recovery within construction plus 10 operating years. Main inputs/results remain unchanged from v0.3.2. Inverse columns change ONE variable while holding others fixed: do not combine their limits. Required volume is algebraically unconstrained and may be physically impossible; no grid capacity is implied.
